

Peti (Pete) Setabandhu

(236)-983-5133 | Vancouver, BC | peteseta@student.ubc.ca | github.com/peteseta | linkedin.com/in/peteseta

EDUCATION

University of British Columbia

Bachelor's of Science, Cognitive Systems: Computational Intelligence & Design

- Cumulative GPA: 91.3%, 4.33/4.33 equiv.
- Relevant coursework (grade %/avg %): Computation, Programs, and Programming (95/76), Models of Computation (93/75), Software Construction (96/77), Basic Algorithms and Data Structures (90/78), Statistical Inference for Data Science (84/73)

Vancouver, BC

Aug 2024 — May 2028

PROJECTS

Full-stack Developer, GrillMe AI: Mock Interview Platform

November 2025

devpost.com/software/grillme-ai

- Built full-stack AI mock interview platform with custom ElevenLabs voice agent and real-time feedback generation; **top 4** at UBC BizTech/a16z Kickstart competition (70+ teams); garnered **200+ organic signups** in first week
- Relevant tools/libraries: *Supabase, OpenAI, ElevenLabs, TypeScript, Cloudflare Workers*

Lead Developer, Mango: Full-Body Gesture Control For Any Game

October 2025

devpost.com/software/mango-full-body-gesture-control-for-any-game

- Architected real-time computer vision system leveraging detection of 520+ body landmarks to translate physical movements into keyboard/mouse inputs, democratizing VR-like gaming; received **1st place** at UBC BizTech's HelloHacks 2025 hackathon
- Relevant tools/libraries: *MediaPipe, OpenCV, PyAutoGUI, NumPy, Python*

WORK EXPERIENCE

Software Engineer Intern

May 2026 — August 2026

TN Digital Solutions

Bangkok, TH

- Built a reusable LLM eval harness (Go capture, Python scoring) that replays **144** model swaps against **48** frozen baseline checkpoints; mapped a cost/quality Pareto frontier, finding a config with **~71%** lower projected cost at parity quality
- Designed correctness-gated scoring for a Thai-legal-AI eval (law recall, grounding by unsupported-claim rate, blind LLM-as-judge, citation validity) and an audit that fails any run whose selections can't be traced to source — closing a gate that previously passed silently
- Researched the legal-RAG modeling space (hierarchy-aware chunking, BGE-M3 retrieval, local Thai models — Typhoon, SEA-LION) and measured how constrained decoding and reasoning affect answer faithfulness and citation grounding

Founding Engineer

November 2025 — January 2026

Rebase

Vancouver, BC

- Built production Stripe billing system handling subscription lifecycle, webhook error recovery, and credit race conditions; implemented JWT-secured cron functions and row-level security policies
- Led 3-person engineering team through **62 PR reviews**, establishing code review standards; architected CI/CD pipelines for database migrations and schema-driven typing to prevent drift

TECHNICAL SKILLS

Languages & Frameworks : Python, Java, R, TS/JS (Next.JS), SvelteKit, Astro, Tailwind
AI/ML & Data: Tensorflow, MediaPipe, OpenCV, NumPy
Tools & Platforms: Cloudflare, Supabase, Vercel, Figma, Git

LEADERSHIP AND ACTIVITIES

Event Committee Executive

June 2025 — Present

UBC AI Safety

Vancouver, BC

- Built custom React webapp for Spectrum activity (Jubilee Middle Ground-style format), enabling real-time audience participation and opinion visualization
- Drove **220%** attendance increase and **570%** social media growth through strategic event planning, speaker partnerships, and cross-functional marketing collaboration
