

Peti (Pete) Setabandhu

(236)-983-5133 | Vancouver, BC | peteseta@student.ubc.ca | github.com/peteseta | linkedin.com/in/peteseta

EDUCATION

University of British Columbia
Bachelor's of Science, Cognitive Systems: Computational Intelligence & Design
• Cumulative GPA: 91.3%, 4.33/4.33 equiv.
• Relevant coursework (grade %/avg %): Computation, Programs, and Programming (95/76), Models of Computation (93/75), Software Construction (96/77), Basic Algorithms and Data Structures (90/78), Statistical Inference for Data Science (84/73)

Vancouver, BC
Aug 2024 — May 2028

PROJECTS

Full-stack Developer, GrillMe AI: Mock Interview Platform
devpost.com/software/grillme-ai
• Built full-stack AI mock interview platform with custom ElevenLabs voice agent and real-time feedback generation; **top 4** at UBC BizTech/a16z Kickstart competition (70+ teams); garnered **200+ organic signups** in first week
• Relevant tools/libraries: *Supabase, OpenAI, ElevenLabs, TypeScript, Cloudflare Workers*

November 2025

Lead Developer, Mango: Full-Body Gesture Control For Any Game
devpost.com/software/mango-full-body-gesture-control-for-any-game
• Architected real-time computer vision system leveraging detection of 520+ body landmarks to translate physical movements into keyboard/mouse inputs, democratizing VR-like gaming; received **1st place** at UBC BizTech's HelloHacks 2025 hackathon
• Relevant tools/libraries: *MediaPipe, OpenCV, PyAutoGUI, NumPy, Python*

October 2025

WORK EXPERIENCE

Software Engineer Intern
TN Digital Solutions
• Built the configuration and decisioning core of a loan origination system: a transactional engine that publishes multi-chunk JSON product drafts across **10+** relational tables atomically (new products with no code deploy), plus a credit-rules evaluator with a typed generic parser and dynamic dispatch over in-list, range, prefix, and multi-source rules spanning credit-bureau (NCB) and alternative data
• Eliminated worker freezes in asynchronous Kafka consumers by classifying errors into retry (transient) vs. skip (malformed/business) paths and reclassifying malformed NCB XML as bad-requests so poison records stop stalling the queue; migrated external mocks from Stubby to WireMock and ran the stack on LocalStack
• Built *Kenbani*, a log inspector (React 19, Bun, SQLite FTS5) that reconstructs distributed traces from Kibana/ELK logs into interactive SVG sequence diagrams; parses **1GB+** logs off the main thread with Bun workers and a custom streaming JSON parser resilient to SSH copy-paste line-wrapping

May 2026 — August 2026
Bangkok, TH

Founding Engineer
Rebase
• Built production Stripe billing system handling subscription lifecycle, webhook error recovery, and credit race conditions; implemented JWT-secured cron functions and row-level security policies
• Led 3-person engineering team through **62 PR reviews**, establishing code review standards; architected CI/CD pipelines for database migrations and schema-driven typing to prevent drift

November 2025 — January 2026
Vancouver, BC

TECHNICAL SKILLS

Languages & Frameworks: Go, Python, Java, R, TS/JS (React, Next.js), SvelteKit, Astro, Tailwind
Data & Infrastructure: PostgreSQL, Kafka, SQLite, Docker, LocalStack, Cloudflare, Supabase, Vercel
AI/ML & Tools: Tensorflow, MediaPipe, OpenCV, NumPy, Git, Figma

LEADERSHIP AND ACTIVITIES

Event Committee Executive
UBC AI Safety
• Built custom React webapp for Spectrum activity (Jubilee Middle Ground-style format), enabling real-time audience participation and opinion visualization
• Drove **220%** attendance increase and **570%** social media growth through strategic event planning, speaker partnerships, and cross-functional marketing collaboration

June 2025 — Present
Vancouver, BC
