

Peti (Pete) Setabandhu

(236)-983-5133 | Vancouver, BC | peteseta@student.ubc.ca | github.com/peteseta | linkedin.com/in/peteseta

EDUCATION

University of British Columbia
Bachelor's of Science, Cognitive Systems: Computational Intelligence & Design
• Cumulative GPA: 91.3%, 4.33/4.33 equiv.
• Relevant coursework (grade %/avg %): Computation, Programs, and Programming (95/76), Models of Computation (93/75), Software Construction (96/77), Basic Algorithms and Data Structures (90/78), Statistical Inference for Data Science (84/73)

Vancouver, BC
Aug 2024 — May 2028

PROJECTS

Full-stack Developer, GrillMe AI: Mock Interview Platform
devpost.com/software/grillme-ai
• Built full-stack AI mock interview platform with custom ElevenLabs voice agent and real-time feedback generation; **top 4** at UBC BizTech/a16z Kickstart competition (70+ teams); garnered **200+ organic signups** in first week
• Relevant tools/libraries: *Supabase, OpenAI, ElevenLabs, TypeScript, Cloudflare Workers*

November 2025

Lead Developer, Mango: Full-Body Gesture Control For Any Game
devpost.com/software/mango-full-body-gesture-control-for-any-game
• Architected real-time computer vision system leveraging detection of 520+ body landmarks to translate physical movements into keyboard/mouse inputs, democratizing VR-like gaming; received **1st place** at UBC BizTech's HelloHacks 2025 hackathon
• Relevant tools/libraries: *MediaPipe, OpenCV, PyAutoGUI, NumPy, Python*

October 2025

WORK EXPERIENCE

Software Engineer Intern
TN Digital Solutions
• Built a reusable LLM evaluation harness (Go payload capture, Python scoring) with capture/continue checkpointing that records baseline runs once, then replays **144** model swaps against **48** frozen checkpoints instead of rerunning the full pipeline; mapped the cost/quality Pareto frontier and found a config with a projected **71%** lower cost at parity quality
• Designed the correctness-gated scoring for a Thai-legal-AI eval (node-level law recall, grounding by unsupported-claim rate, blind pairwise LLM-as-judge, citation validity); built an audit that ties each LLM call to its issue-tree node by law/section-ID overlap and fails any run whose selections can't be traced, closing a gate that used to pass silently when logs were missing
• Built *Kendulix*, an Excel-to-Schedulix job import and editor that reconciles workbook jobs against the live schedule with per-token fuzzy similarity scoring, virtualizes very large sheets, and reached **100%** test coverage on the export path

May 2026 — August 2026
Bangkok, TH

Founding Engineer
Rebase
• Built production Stripe billing system handling subscription lifecycle, webhook error recovery, and credit race conditions; implemented JWT-secured cron functions and row-level security policies
• Led 3-person engineering team through **62 PR reviews**, establishing code review standards; architected CI/CD pipelines for database migrations and schema-driven typing to prevent drift

November 2025 — January 2026
Vancouver, BC

TECHNICAL SKILLS

Languages & Frameworks : Python, Java, R, TS/JS (Next.JS), SvelteKit, Astro, Tailwind
AI/ML & Data: Tensorflow, MediaPipe, OpenCV, NumPy
Tools & Platforms: Cloudflare, Supabase, Vercel, Figma, Git

LEADERSHIP AND ACTIVITIES

Event Committee Executive
UBC AI Safety
• Built custom React webapp for Spectrum activity (Jubilee Middle Ground-style format), enabling real-time audience participation and opinion visualization
• Drove **220%** attendance increase and **570%** social media growth through strategic event planning, speaker partnerships, and cross-functional marketing collaboration

June 2025 — Present
Vancouver, BC
